DETAILED ACTION

1. This Office Action is in response to Applicant's amendment filed on 2/10/2006. Claims 18, 18, 23, 27, 32 and 33 have been amended. Claims 1-11 and 13-36 are pending.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The cited prior art, either singularly or in combination, fails to anticipate or render the amended limitation obvious. The closest prior art, Yorke-Smith, discloses the similar invention, however, Yorke-Smith teaches each checkpoint or control block is stored as a record at the encrypted data blocks are stored in a separate file. However, Applicant claimed limitation recites that the checkpoint inserted in the protected digital good at varying positions outside of and relative to the protected segments with which the checkpoints are associated. While Yorke-Smith also teaches that the checkpoint is positioned inside the data segment to be encrypted, along with the encrypted data segment, in either instance, it is patentably distinct from the claimed limitation where the system receiving the protected digital good invoke a function call to validate that the at least one protected segment with which the checkpoint is associated has not been tampered with based on at least one form of protection applied to the at least one protected segment as recited in the amended claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
